***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-5, drawn to Welding method, classified in class 219, subclass 121.64.

II. Claims 6-7, drawn to Railroad car, classified in class 105, subclass 396.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product.

Since the product is not allowable, restriction is proper between said method of making and method of using. The product claim will be examined along with the elected invention (MPEP § 806.05(i)).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to John H. Mion on 07/27/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
